

# Water Harvester 77C

### Technical Specifications Dimensions

Height	39.4 in (111 cm)
Width	15.4in (40 cm)
Depth	15.4in (40 cm)
Weight (unladen)	91lbs (41.2kg)

### Power

Voltage	120 V 60Hz
Heating watts	500W
Operating watts	380W

### System Specifications

Working Temperature	59F - 104F (15C - 40C)
Working Humidity	35% - 95%
Water Storage Capacity	3 gallons (12.5 Liters)
Hot Water range	167F - 199F (75C - 93C)
Cold Water range	37F - 50F (4C - 15C)

Create fresh, pure great tasting water from air!

Reduce your water footprint and improve your quality of life

# Water Harvester 77C

Harvesting pure drinking water from the Air

## SERVICE SOLUTIONS

We back our products 100%. The Water Harvester 77C comes with a full year warranty and three year on the compressor. To ensure the purest water possible, we offer an onsite service agreement that covers filters, UV lamps, coil cleaning, refrigerant, tank and line cleaning for a nominal charge.

*Anywhere, anytime...*

*Everyone deserves pure water*

## HOW IT WORKS

The Water Harvester 77C is a state of the art air to water generator which condenses humidity and purifies it for drinking. We now have an alternative to filtered contaminated ground source water. You will never again need to worry about what's in your water.

**CARTIS® Filtration system** and UV technology creates the purest drinking water available without the use of any chemicals. The electrostatic air filter cleans the air in your business, home or office.

## FEATURES

**Touch Display** – offers easy to read graphics and monitoring of all working components and settings

**Electronic sensors** – Found on all critical components alerts when malfunctioning

**Energy Efficient** – Automatically turns off when storage capacity has been achieved

**Electrostatic air filter** – Removes airborne particles and returns clean air into the surroundings

**CARTIS® Filtration system** – guarantees pure safe chemical free drinking water

**Easy maintenance** – All filters are equipped with quick disconnects

**Hybrid** – in areas of low humidity can be connected to municipal water

**Child lockout** – Special button combination to prevent scalding from hot water

**Temperature control** – adjust cold setting from 39 – 50F, hot setting from 169 – 199F

**Easily transportable** – on wheels to make moving from room to room effortless

**Beautiful design** – complements any home, office or business

**Quiet operation** – Lower db levels than other Atmospheric water appliances.

**Leak protection** – The Water Harvester will shut off when a leak is detected.

**Inverter Compressor** – reduced power over standard compressor

## Why Atmospheric Water

- No external water source
- No bottles to store (full or empty)
- No deliveries
- No CO2 released into the air from deliveries
- Saves money over bottled water
- Portable
- Cleans your air
- Dehumidifies for better comfort
- Oxygenated water
- Reduces stress on our natural water resource by not using ground water
- Convenient – make your own water on site

## CARTIS® filtration

- Removes everything down to .003 micron
- Dissolved oxygen to purify and residual disinfecting control
- Removes heavy metals (mercury, lead), VOC's, bacteria, microbes, nitrates, pesticides, herbicides, chemical products, chloramines, organic chlorides, cyanuric acid, hydrocarbons ...
- **CARTIS® IS THE ONLY KNOWN ALTERNATIVE TO CHLORINE**
- This system is virtually maintenance free – just plug it in and start enjoying pure drinking water

Water Source Technologies (WST) is a leader in bringing you innovation, conservation and environmentally friendly products which can help you to **reduce your footprint and improve your quality of life.**
